Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Acknowledgment

1. The amendment filed on 2/25/2007 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 1 and 3-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Burns et al. (5,823,543).**

Burns et al. in figures 4-6, disclose an in-line roller skate comprising a boot (13e) for receiving the foot of a user. The boot includes a heel portion, a toe portion and a bottom portion. Burns et al. also disclose an outsole (not number, as shown in figure 6) disposed along the bottom portion of the boot, a chassis (20c) including a pair of elongated, parallel frames attached to the bottom portion of the skate. The frames have opposed front and rear ends and wherein the frames are connected at the front ends only by an axle of one of the wheels (figure 6). Burns et al. also disclose a recess (not number, as shown in figures 4, 6) disposed in the outsole of the boot and a plurality of wheels (22c, 24c, 26c, 28c) mounted on the chassis, at least one of the plurality of wheels being partially recessed within the recess of the outsole.

Art Unit: 3618

Regarding claim 2, Burns et al. disclose the recess, which is located in the outsole at the toe portion of the boot.

Regarding claim 3, Burns et al. disclose a first wheel (22c), which mounted on the chassis at the toe portion of the boot.

Regarding claim 4, Burns et al. disclose the first wheel, which is partially disposed within the recess.

Regarding claim 5, Burns et al. disclose a second wheel, which is mounted on the chassis behind the first wheel.

Regarding claim 6, Burns et al. disclose the first and second wheels, which are partially extend into the recess.

Regarding claim 7, Burns et al. disclose the second wheel, which is partially disposed within the recess.

Regarding claim 8, Burns et al. disclose the plurality of wheels having the same size diameter.

Regarding claim 10, Burns et al. disclose each of the frame including a front and rear bracket for mounting the frame to the outsole.

Regarding claim 11, Burns et al. disclose each the front bracket that is mounted to the toe section of the outsole on a side of the recess such that the recess is located between the front mounting brackets of the frame.

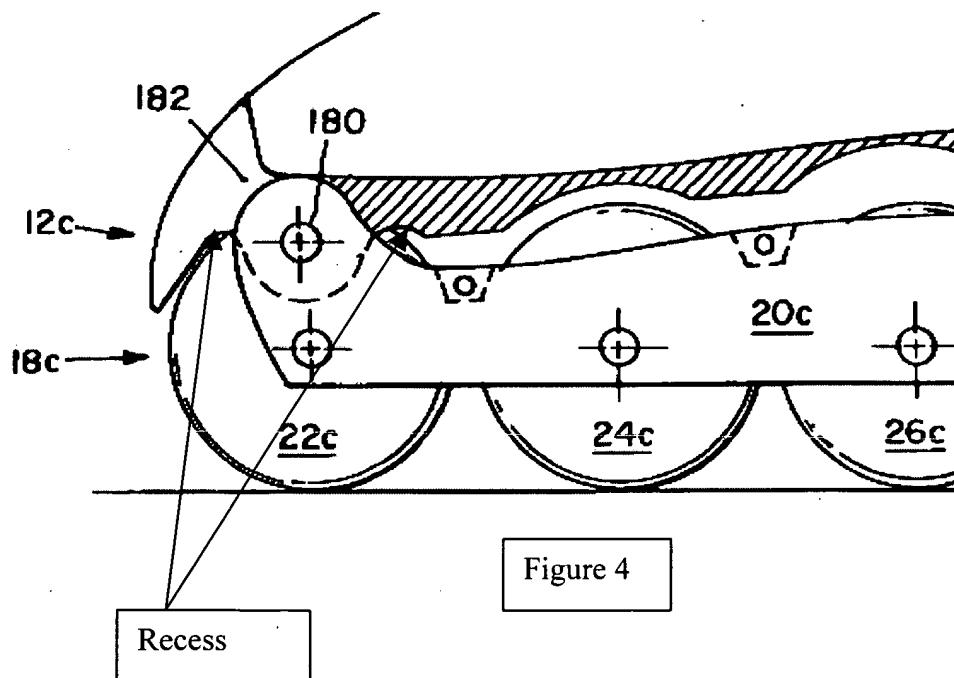

Regarding claim 12, Burns et al. disclose each of the frames including a front and rear bracket for mounting the bracket to the outsole.

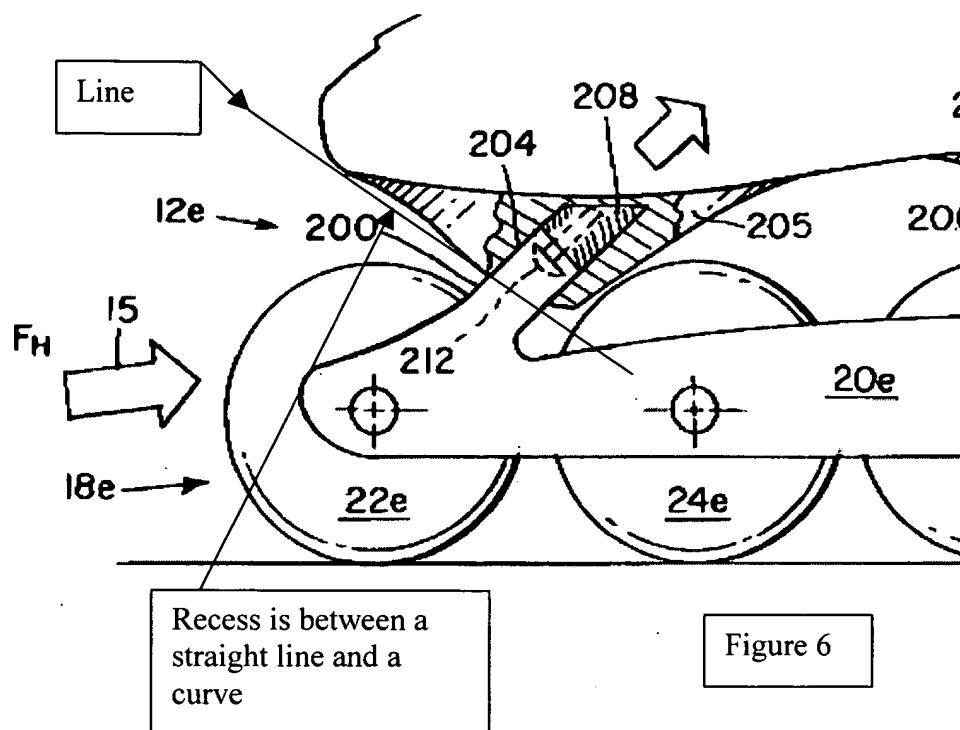

Regarding claim 13, Burns et al. disclose each of the front brackets that are

mounted to the toe section of the outsole on a side of the recess such that the recess is located between the front mounting brackets of the frame.

Response to Arguments

4. Applicant's arguments filed 2/25/2007 have been fully considered but they are not persuasive. In response to applicant's remark that Burn does not disclose a recess at a toe portion, but the recess in Burn is at middle portion. The examiner disagrees, because Burn in figures 4 and 6, show the recess at the toe portion (see figures 4 and 6). In figure 6, the recess is between the straight line and a curve line.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
